Any person who takes the paper reguarly from the post office, whether directed to his name or whether he is a subscriber or not, is responsible for the pay.

The courts have decided that refusing to take newspapers from the post office, or re-moving and leaving them uncalled for, is

IN SEPTEMBER.

Mornings frosty grow, and cold, Brown the grass on hill and wold; Crows are cawing sharp and clear Mustering flocks of blackbirds call; Here and there a few leaves fall, In the meadows larks sing sweet, Chirps the cricket at our feet-

Noons are sunny, warm and still; A golden haze o erhangs the hill, Just within the open door: Still the crickets call and creak-Never found, though long we seek-Oft comes faint report of gun; Busy flies buzz in the sun-In September.

Evenings chilly are, and damp, Parly lighted is the lamp; Fire burns and kettle sings, Smoke ascends in thin blue rings; On the rug the children lie; In the west the soft lights die; From the class a robin's song Rings out sweetly, tingers long-In September.
-Elizabeth Cole, in St. Nicholas.

----TONS OF LETTERS.

Missives Sent and Received by Washington Officials.

Fifty Thousand Letters a Day Received by the President Alone-How the Mail Is Assorted, Distributed and Answered-Post-Office Notes.

The President of the United States receives daily an average of fifty thousand letters, which, as a rule, are answered or their recept acknowledged formal reply but considerable research as their work has to do with our foreign relations, the army or navy, the fiscal machinery of the Government, its internal relations, the postal service or the admin stration of justice. The heads of these seven principal departments are asked by the President to House and form what is known as his Cabinet. At these conferences the more important business of the several departments is discussed, so that the work may be done promptly and harmoniously; and so well regulated is the system that it is not necessary for the President to see personally but a very small part of the Executive correspondence. Two or three sacks only, out of the tons of mail matter that is dumped every morning on the floor of the Washington Cit; post-office, goes to the White House.

This post-office is the third in the country in volume of business, though Washington is only the fourteenth city in population. This is on account of the enormous official mail that passes through Postmaster Conger's bands. During the fiscal year which ended June 30, 1885, the letters received were in excess of 25,000,000, or about 70,000 daily, and of this total it is estimated about 70 per cent goes the depres

ment-The refluent tide is even larger, the out-good delivery includes all the publications of the Government. tistics to this field would be stagger's They would be on such a huge scale that the figures would lose their means ments, will pass through the office, and

He looks and acts much like General Francis A. Walker, and, like that gentleman, has a knack at turning off bus ness quickly and well.

There are "crews" of men in the office all the time, night and day, week days.

Sundays and holidays. One section made to transport the two great men pairs health gradually, but distinctly, the mention of the control of the control

coming mail is early in the morning, for protection, for decorations and for music and entertainment. The town is guarded all around and no person is allowed to enter or leave without a pass.

nine o'clock the mail wagons for the and every person who enters the town. mine o'clock the mail wagons for the departments and the outlying bureaus are hauled up in the rear of the office, and the mail is handed out to them for distribution. These vehicles are of cerewy description, from heavy, red, circum-like vans to neat covered carriages, with nervous prostration, and their and Sunday excursions about them. The heaviest mail generally goes to the Post-office Department, due to the routine correspondence between the department and the 50,000 postmasters of the country. Each postmaster has occasion like vans to a control of the postmaster has occasion like vans to a fine town in the postmaster has occasion like vans to a fine and every person who enters the town has his and the outlying bureaus is under police surveillance, has his are hauled up in the rear of the outle, has his and the wast of the policy surveillance, has his are hauled up in the rear of the odied, and the mail is handed out to them for distribution. These vehicles are of everything he owns searched, to guard against dynamite. Cash and set out to make some one Happy. To the first man he met he said:
